SYNCHRO

Sedute ad alto contenuto tecnologico; la loro particolarità è costituita dal meccanismo che permette la variabilità del rapporto di inclinazione fra sedile e schienale. Col variare della posizione di seduta l'angolo di apertura fra essi aumenta in un preciso rapporto garantendo all'operatore la posizione ergonomica più corretta. La serie "Synchro" viene fornita nelle versioni con basamento girevole o fisso con o senza braccioli.

High technology sitting with adjustable seat and backrest with independent positioning. Pulling the lever, both the backrest and the seat are adjusted assuring the user the best ergonomic position. "Synchro" range is available in 2 versions: fixed or swivel, with or without arms.
